

Project Number: IST-2001-33234
Project Acronym: PEPITO
Title: PEer-to-Peer Implementation and TheOry
Extended distribution subsystem
Due date: project month 30
Delivery Date: 2004-06-30
Responsible Partner: SICS

Deliverable no:	D4.5
Title:	Extended Distribution Subsystem
Workpackage no:	WP4
Due date:	30
Delivery date:	2004-06-30

Short Description

This deliverable is the implementation of the Extended Distribution Subsystem, i.e. the Distribution SubSystem(DSS) extended with a structured peer-to-peer service. The deliverable is in the form of a middleware-library with attached examples. A description of the new features can be found in deliverable D4.6. Notable features are: a key-based-routing interface, a decentralized migrating coordinator protocol and a scalable stream protocol.
