

Project Number: IST-2001-33234
Project Acronym: PEPITO
Title: PEer-to-Peer Implementation and TheOry
First Progress Report on Distributed Algorithms
Due date: project month 36
Delivery Date: 2004-12-31
Responsible Partner: SICS
Participating Partners: SICS

Deliverable no:	D5.2
Title:	P2PmBlog - A demonstrator of a P2P based blogging system
Workpackage no:	WP5
Due date:	36
Delivery date:	2004-12-31

Short Description

This deliverable is the implementation of a demonstrator application, the P2PmBlog system, that is described in the deliverable report D5.3. Note that the topic of the demonstrator application is different than the one listed in the technical annex. The change in topic is in accord with the technical annex.

The deliverable consists of the source code of the P2PmBlog system, written in Java and C++, together with instructions on how to compile it, as well as a complete set of API documentation.
