

Project Number: IST-2001-33234
Project Acronym: PEPITO
Title: PEer-to-Peer Implementation and TheOry
Report on Demonstrator Applications
Due date: project month 36
Delivery Date: 2004-12-31
Responsible Partner: UCL
Participating Partners: UCL, SICS, INRIA, EPFL

Deliverable no:	D5.3
Title:	Report on Demonstrator Applications
Workpackage no:	WP5
Due date:	36
Delivery date:	2004-12-31

Short Description

This deliverable explains the four main demonstrator applications we did in PEPITO, namely P2PmBlog, PostIt, Community Panel, and Car Park. Of these four demonstrators, the software for two of them are also deliverables, namely PostIt (D5.1) and P2PmBlog (D5.2). We have made the other two available on the Web. The development of all these demonstrators took approximately 36 person-months of work in all, not counting the development of the underlying peer-to-peer libraries and algorithms.
