Do you thrive in leading a team towards next practice?

Project manager with focus in applied research projects to our team in Västerås.

RISE SICS Västerås is looking for a full-time project manager with knowledge and experience from driving successful research and development projects in collaboration with industry. You will work in a highly dynamic environment with different teams and in a wide range of application areas ranging from data analytics, optimization and deep learning via software development and testing to gamification. It is important that you have a genuine passion for project management, working with people and know the keys to success. You simply make work work! Projects will be performed in close cooperation with Swedish industry, public sector and international research partners.

In this role you will:

- Drive research projects within RISE SICS Västerås that lead the way for future industry.
- Be part of a creative team that conducts applied research in close collaboration with the public sector and industrial partners, often a mix of all!
- Coach and collaborate with other project managers in RISE SICS Västerås.
- Understand the industry’s need of using data as a new way to do business, by using new technology focusing on human interaction.
- Discuss research projects using relevant methods in different phases, including application writing.
- Develop new methods for effective project management and bring them into different application areas, in particular within the automation sector.
- Advocate research findings to diverse audiences through best suitable communication means: inspirational talks, demos, videos, presentations, articles.

Minimum qualifications:

- Hold an engineering-related MSc degree, and/or have equivalent experience from industry. A PhD degree in a relevant area is a bonus.
- Have experience from managing research and science driven projects with many partners.
- Be fluent in Swedish and English.

Preferred qualifications

- Curious, goal-oriented, flexible, ambitious and communicative.
- Love to tackle wicked problems and bring projects to the next level.
- Experience in writing applications for research funding.
- Skilled in presenting and documenting your work.

Place of employment: Västerås
Full time and temporary employment for 2 years.
Employment available immediately.

RISE SICS Västerås is a research institute with the aim to strengthen the innovation system in the Mälardalen region by offering applied research to both private and public organizations. Our projects typically involve a team of researchers and focus on delivering tangible results that create immediate and long-term value, based on the latest research results. We are constantly growing and are looking for researchers who enjoy the challenge of working in close collaboration with industry. SICS Västerås has a flexible organization that develops and applies methods and solutions in close collaboration with industrial, public and academic partners. Our core values are to be open-minded, value-driven, research-oriented, and to have fun! Read more about us at www.sics.se

RISE – The Swedish Research Institute
The RISE institutes Innventia, SP, and Swedish ICT have merged in order to become a stronger research and innovation partner. Through our international collaboration programmes with academia, industry, and the public sector, we ensure the competitiveness of the Swedish business community on an international level and contribute to a sustainable society. Our 2,200 employees support and promote all manner of innovative processes, and our roughly 100 testbeds and demonstration facilities are instrumental in developing the future-proofing of products, technologies, and services. RISE is fully owned by the Swedish state. www.ri.se
